

POP-UP EXHIBITION

School of Education | 12th - 21st September 2023

M.Phil student Tanya Carcione
Supervisors Dr. Lisa Paris and Dr. Carol Carter

Arts-Based Education Research (ABER) combines both visual and written forms to investigate and present educational research.

This pop-up exhibition presents a sample of work-in-progress artworks produced as part of a study investigating teaching practices that support culturally and linguistically diverse (CaLD) students in the senior school Visual Arts context. Data analysis samples displaying the translation of written interview data into artworks will also be on display providing insight into the ABER methodology used in this study.
